INTERNATIONAL SEARCH REPORT

International application No.

PCT/FI 2004/000772

A. CLASSIFICATION OF SUBJECT MATTER

IPC7: A61K 31/702, A61K 31/7056, A61P 29/00, A61P 3/10, A61P 9/10, A61P 11/06, A61P 19/02, A61P 19/04,25/02, 25/28, 37/08
According to International Patent Classification (IPC) or to both nanonal classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC7: A61K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CHEM ABS DATA, EPO-INTERNAL, WPI DATA, BIOSIS, MEDLINE

INTERNATIONAL SEARCH REPORT

International application No. PCT/FI 2004/000772

| Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet) |
|---|
| This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons: |
| 1. Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely: |
| 2. Claims Nos.: 1-19 because they relate to parts of the international application that do not comply with the prescribed requirements to such an |
| extent that no meaningful international search can be carried out, specifically: See next sheet |
| 3. Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a). |
| Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet) |
| This International Searching Authority found multiple inventions in this international application, as follows: |
| 1. As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims. |
| 2. As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee. |
| 3. As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.: |
| |
| 4. No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: |
| Remark on Protest The additional search fees were accompanied by the applicant's protest. |
| No protest accompanied the payment of additional search fees. |

Box II.2

Present claims 1-19 relate to use of an extremely large number of possible compounds. Support within the meaning of Article 6 PCT and / or disclosure within the meaning of Article 5 PCT is to be found for only a very small proportion of these compounds.

Further, the expressions "useful as an agent capable of influencing an amine oxidase enzyme activity", "a disease or condition benefiting from inhibiting an amine oxidase enzyme", "inflammatory disease or condition", "a disease related to carbohydrate metabolism", "a disease related to aberrations in adipocyte differentiation or function or smooth muscle function" and "vascular disease" in claims 1, 5-6, 8, 10, 12 and 14 relate to a large and undefined number of different disorders which cannot be clearly defined by these expressions.

The application provides support for use of the compounds in the treatment of only a very limited number of such disorders. Moreover, in order to be considered clear according to Article 6 PCT, claims for second medical indications cannot be defined purely by the mechanism of action, but have to be limited to well-defined, practical applications in the form of specific pathological conditions.

Claims 1-19 do therefore not meet the requirements of Article 6 PCT that claims shall be clear, concise and supported by the description.

In the present case, the claims so lack support, and the application so lacks disclosure, that a meaningful search over the whole of the claimed scope is impossible. Consequently, the search has been carried out only for those parts of the claims related to the aminoglycoside antibiotics shown in Scheme 1 (pages 13-15 of the description), in combination with the following medical conditions: different kinds of arthritis and joint diseases, vasculitis, Crohn's disease, syndrome, multiple irritable bowel sclerosis, Alzheimer's disease, pulmonary inflammatory disease, asthma, chronic obstructive pulmonary disease, dermatitis, psoriasis, atherosclerosis, retinopathy, arteriosclerosis and ischemic heart disease. A general search of the VAP-1/SSAO inhibiting activity has been performed but cannot be considered complete regarding the various medical uses.
